ABSTRACT:

PROBLEM TO BE SOLVED: To provide a cleaning device by which a scavenging quantity of dust and dirt can be significantly improved by three-dimensionally capturing dust and dirt and dust and dirt in implanted hair of a carpet can also be scraped out and scavenged.

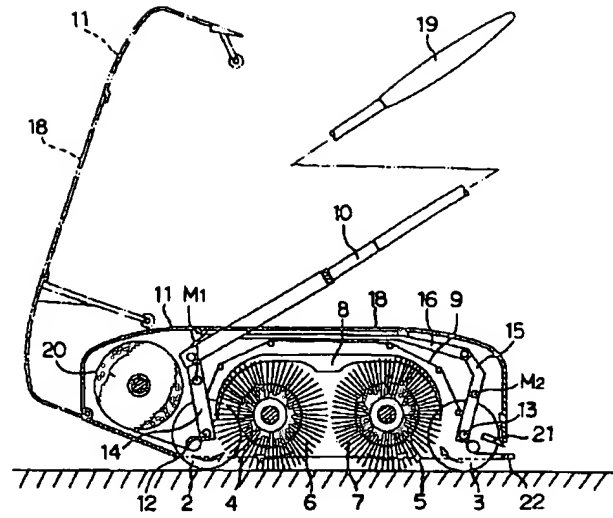

SOLUTION: In a cleaning device formed so that dust and dirt can be captured by a pressure sensitive adhesive sheet 9 by scraping away dust and dirt existing on a floor and a carpet by an advancing brush 6 and a retreating brush 7, an advancing driving wheel 2 and a retreating driving wheel 3 to rotate the advancing brush 6 and the retreating brush 7, are selectively rotated by bringing them into pressure contact with an advancing driven wheel 4 and a retreating driven wheel 5 coaxially arranged with the advancing brush 6 and the retreating brush 7.
